Subject: Request to Extend or Re-open Comment Period
Date: Tuesday, November 12, 2019 3:08:04 PM

The purpose of this note is to request that you extend or re-open the comment period on proposed stormwater discharge permit for WAS02661 for Whidbey Island's Naval Base. It has been brought to my attention that there are toxic PFA chemicals in the on-going discharges to Dugalla Bay and leaking to the aquifer and these were unknown to the EPA and the public when the comment period was originally opened. The extension or re-opening will allow more time for information to get out to the public and for them to comment on the risks posed by these discharges.

Thank you for your consideration and action on this issue.
